Comprehensive Analysis of EdTech Start Ups in India

Project Overview

This project presents a comprehensive analysis of the EdTech Start-Up ecosystem in India through an interactive Power BI dashboard. The objective of this analysis is to transform raw data into meaningful insights and understand the growth, performance, and emerging trends within the EdTech industry.

The dashboard has been designed using different visualization techniques to simplify complex data and support effective decision-making.

Visualizations Included

-  Interactive Dashboard
-  Trend Analysis
-  Comparative Analysis
-  KPI & Performance Metrics
-  Filters and Navigation
-  Data Insights & Reporting

Project Objectives

- * Analyze EdTech market trends and performance
- * Identify key patterns and business insights
- * Present data in a clear and visual format
- * Support data-driven decision-making

Tools & Technologies Used

Power BI | Power Query | DAX | Data Visualization

Q1-Total Number of Courses:

3K

Total Number of Courses (after cleaning)

Q-2 Calculate the average course rating

4.70

Average Rating

Q-3 Calculate the total and average number of views

3.21K

Average Number of per Course

8M

Overall Registered

Q-4 Analyze course type distribution and count courses by category and subcategory.

Category				
Select all	Business	Health	Math and Logic	Social Sciences
(Blank)	Computer Science	Information Technology	Personal Development	
Arts and Humanities	Data Science	Language Learning	Physical Science and Engineering	

Q-5 Calculate average views by category, sub-category and language

Category				
Select all	Business	Health	Math and Logic	Social Sciences
(Blank)	Computer Science	Information Technology	Personal Development	
Arts and Humanities	Data Science	Language Learning	Physical Science and Engineering	

Q-6 Find language distribution of courses.

Q-7 Analyze language preference for top 5 categories based on viewers preference

Category	Average Number of per Course	Ranking
+ Data Science	6,326.70	1
+ Information Technology	4,599.42	2
+ Computer Science	4,352.63	3
+ Personal Development	3,220.66	4
+ Language Learning	2,844.29	5
Total	4,947.51	2

Q-8 Analyze impact of subtitles on course views.

Q-9 Identify top 3 instructors for each category and sub- category based on ratings

Category	RankingTutors
⬆	1
⊕ Arts and Humanities	1
⊕ Business	1
⊕ Computer Science	1
⊕ Data Science	1
⊕ Health	1
⊕ Information Technology	1
⊕ Language Learning	1
⊖ Math and Logic	1
⊕ Math and Logic	1
⊕ Personal Development	1
⊕ Physical Science and Engineering	1
⊕ Social Sciences	1
Total	3

Q-10 Analyze relationship between course duration and views by category and sub-category.

Conclusion

This dashboard provides a comprehensive analysis of EdTech courses by examining course ratings, views, categories, languages, subtitles, instructors, and duration. The analysis helps identify user preferences and understand which course characteristics contribute to higher engagement and better performance.

Key Insights

- . Course engagement varies across different categories and sub-categories.**
- . Higher-rated courses generally show stronger user interest and participation.**
- . Language preference plays an important role in attracting viewers.**
- . Courses with subtitles can improve accessibility and reach a wider audience.**
- . Certain instructors perform better based on ratings and viewer engagement.**
- . duration may influence views, showing differences in user learning behavior.**
- . These insights can support better content planning and decision-making in EdTech platforms.**
